

Anto Soji

Software Developer

antosoji.a@gmail.com | +91 88484 68714 | linkedin.com/in/anto-soji | github.com/4NK00 | Kottayam, Kerala

TECHNICAL SKILLS

Languages: Python, Java, PHP, JavaScript, C, C++, SQL, JSON

Frontend: HTML5, CSS3, Tailwind CSS, Vanilla JavaScript, Bootstrap

Backend: Django, Laravel

Databases: PostgreSQL, MySQL, SQLite

Tools & Technologies: Git, GitHub, Linux, Postman, VS Code, Android Studio, Node.js, npm

Cloud & Deployment: Render, Neon PostgreSQL

Concepts: REST APIs, MVC Architecture, Responsive Web Design

PROFESSIONAL EXPERIENCE

Software Developer, Gentrius Solutions May 2025 - Present · Millungal Junction, Kanjiramattom, Ernakulam, Kerala

Company Website

- Developed and deployed the Gentrius Solutions official website from scratch using Django, HTML, Vanilla JavaScript, Tailwind CSS, and Node.js.
- Deployed the application on Render and **migrated the production database to Neon** after identifying the limitations of Render's ephemeral PostgreSQL service, ensuring persistent production data.
- Implemented server-side and client-side validation for contact forms to improve data quality and user experience.
- Implemented a **custom math CAPTCHA** to reduce automated bot submissions through the contact form.
- Maintained the production website by fixing bugs, implementing new features, and improving overall reliability.

Client Project – Little Eva Collections

- Developed an imitation jewellery e-commerce website using **Wix Studio** for a local business.
- Customized responsive layouts, product catalog, and branding based on client requirements.
- Integrated **Razorpay** for secure online payments.
- Configured shipping and local delivery workflows.
- Delivered a **production-ready website** within the project timeline.

PROJECTS

AssistiveControl · Kotlin, Android SDK, Android Studio github.com/4NK001/AssistiveControl

- Developed an Android accessibility application that provides floating on-screen controls for hardware button functions.
- Implemented Accessibility Service and overlay permissions to enable system-level actions such as volume controls and power menu.
- Designed a collapsible floating widget that remains unobtrusive while improving device usability.
- Implemented runtime permission handling for Accessibility Service and overlay permissions.

CarSafari · Django, MySQL, Nominatim github.com/4NK001/carSafari

- Integrated the Nominatim API to calculate travel distance between pickup and destination locations.
- Implemented ride booking workflow and location search functionality.
- Designed normalized MySQL database schemas for users, rides, and bookings.

EDUCATION

Bachelor of Computer Applications (BCA) November 2022 – March 2025

Nirmala Arts & Science College, Mulanthuruthy, MG University, Kottayam
