## Software Developer

antosoji.a@gmail.com | +91 88484 68714 | linkedin.com/in/anto-soji | github.com/4NK00 | 4nk001.github.io | Kottayam, Kerala

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript, PHP, C, C++, SQL

**Frontend:** HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS

**Backend & Frameworks:** Django, FastAPI, Pydantic, SQLAlchemy

**Databases:** PostgreSQL, MySQL, SQLite

**Tools & Technologies:** Git, GitHub, Linux, Postman, VS Code, Node.js, npm

**Cloud & Deployment:** Render, Neon PostgreSQL

**Concepts:** Object-Oriented Programming (OOP), Data Structures, REST APIs, Networking Fundamentals, Database Fundamentals, SDLC, JSON

## EXPERIENCE

**Software Developer**, Gentrius Solutions May 2025 - Present · Millungal Junction, Kanjiramattom, Ernakulam, Kerala

### Company Website

- Developed and deployed the Gentrius Solutions official website from scratch using Django, HTML, Vanilla JavaScript, Tailwind CSS, and Node.js.
- Deployed the application on Render and **migrated the production database to Neon** after identifying the limitations of Render's ephemeral PostgreSQL service, ensuring persistent production data.
- Implemented server-side and client-side validation for contact forms to improve data quality and user experience.
- Implemented a **custom math CAPTCHA** to reduce automated bot submissions through the contact form.
- Troubleshooted production issues, implemented new features, and maintained application reliability based on changing requirements.

### Client Project – Little Eva Collections

- Developed an imitation jewellery e-commerce website using **Wix Studio** for a local business.
- Customized responsive layouts, product catalog, and branding based on client requirements.
- Integrated **Razorpay** for secure online payments.
- Configured shipping and local delivery workflows.
- Delivered a **production-ready website** within the project timeline.

## PROJECTS

**AssistiveControl** · Kotlin, Android SDK, Android Studio [github.com/4NK001/AssistiveControl](https://github.com/4NK001/AssistiveControl)

- Developed an Android accessibility application that provides floating on-screen controls for hardware button functions.
- Implemented Accessibility Service and overlay permissions to enable system-level actions such as volume controls and power menu.
- Designed a collapsible floating widget that remains unobtrusive while improving device usability.
- Implemented runtime permission handling for Accessibility Service and overlay permissions.

**CarSafari** · Django, MySQL, Nominatim [github.com/4NK001/carSafari](https://github.com/4NK001/carSafari)

- Integrated the Nominatim API to calculate travel distance between pickup and destination locations.
- Implemented ride booking workflow and location search functionality.
- Designed normalized MySQL database schemas for users, rides, and bookings.

## EDUCATION

**Bachelor of Computer Applications (BCA)** November 2022 – March 2025

Nirmala Arts & Science College, Mulanthuruthy, MG University, Kottayam
